

Here it is. Final. Clean. Everything we built.

Project:NINE TAILS — Phase 1

The complete program

The Philosophy in One Line

Train the process. The outcome follows without being chased.

Your Equipment

Wall mounted pull up bar — multi grip
7.5kg dumbbells — pair
Bodyweight
Chair

The Cycle

Day 1 Push
Day 2 Pull
Day 3 Legs + Core
Day 4 Rest
Day 5 Push
Day 6 Pull
Day 7 Legs + Core or full rest — read the body

Each muscle group stimulated every 3-4 days. Twice per week. Optimal frequency for natural adaptation.

The Execution Rule — Non Negotiable

Every single rep across the entire program:

3 seconds down
Pause at bottom
1 second up

Full range — no partial reps
Zero momentum

This is the program. The exercises are just the vehicle.

DAY 1 and DAY 5 — PUSH

Chest, Shoulders, Triceps

Exercise	Sets	Reps	Variation across sets
Push up progression	3	12/10/8	Set 1 incline, Set 2 standard, Set 3 decline
Pike push up	3	10/10/8	Set 1 standard, Set 2 feet elevated, Set 3 slow tempo
Overhead tricep extension	3	12/10/10	Set 1 double arm, Set 2 single arm left, Set 3 single arm right
Diamond push up	3	8/8/8	Set 1 standard, Set 2 pause at bottom, Set 3 slow negative

Rest between sets: 60-90 seconds **Total sets:** 12 **Total time:** 35-40 minutes

DAY 2 and DAY 6 — PULL

Back, Biceps, Rear Delts, Grip

Exercise	Sets	Reps	Variation across sets
Pull up progression	3	max/max/max	Set 1 wide grip, Set 2 neutral grip, Set 3 chin up
One arm dumbbell row	3	12/10/10 each	Set 1 elbow flared, Set 2 elbow tucked, Set 3 slow negative
Rear delt fly	3	12/12/12	Set 1 bent over, Set 2 chest on chair, Set 3 slow tempo
Curl progression	3	10/10/10	Set 1 standard, Set 2 hammer, Set 3 slow negative

On pull ups: Full reps or negatives only. Jump to top, 5 seconds down. No partial reps, no kipping.

Rest between sets: 60-90 seconds **Total sets:** 12 **Total time:** 35-40 minutes

DAY 3 and DAY 7 — LEGS + CORE

Quads, Hamstrings, Glutes, Calves, Core

Exercise	Sets	Reps	Variation across sets
Squat progression	3	15/12/10	Set 1 bodyweight pause, Set 2 goblet, Set 3 split squat
Hip hinge progression	3	12/12/12	Set 1 RDL both legs, Set 2 single leg RDL, Set 3 hip thrust
Calf raise progression	3	15/15/15	Set 1 both legs, Set 2 single leg right, Set 3 single leg left
Core progression	3	—	Set 1 plank 40s, Set 2 hollow body 20s, Set 3 hanging knee raise 10

Rest between sets: 60-90 seconds **Total sets:** 12 **Total time:** 35-40 minutes

DAY 4 — REST

Non negotiable. This is where adaptation happens.

Morning → Surya Namaskar full rounds + meditation

Evening → 20 min Krav Maga shadow work

Cardio Placement

Not a separate day. Attached to rest days as a light layer:

Day 4 evening → 30-40 min Zone 2 walk after Krav

Pace where you can speak in full sentences

Not a workout — cortisol regulation and blood flow

No sprinting in Phase 1. Aerobic base first. Sprint work enters Phase 2.

Surya Namaskar — Daily Including Rest Days

Push days → 4 rounds maximum in morning

Chaturanga is a push pattern

More than 4 pre-fatigues chest and shoulders

All other days → Full rounds, whatever feels right

Meditation every morning without exception. This is the mental layer. Not optional.

Krav Maga — The Nine Tails

Shadow work on Day 4 evening. 20 minutes. Slow and deliberate.

One technique per two weeks in this order:

Week 1-2 → Stance, footwork, weight distribution

Week 3-4 → Straight punch — stopping power mechanics

Week 5-6 → Palm heel strike

Week 7-8 → Front kick — space creation

Week 9-10 → Wrist grab release

Week 11-12 → Front choke defense

Source: Boaz Aviram on YouTube. Two steps from Imi Lichtenfeld directly. Closest civilian lineage available.

The rule: Slow motion until the movement is clean. Speed is never trained. Speed comes by itself when the pattern is correct. A wrong pattern trained fast becomes a wrong reflex under stress.

It doesn't announce itself. It compounds quietly.

Plateau Elimination

Every 4 weeks exactly one variable changes. Not two. Not three. One.

Month 1 → Reps increase by 2 per set across all exercises

Month 2 → Easiest set variation replaced by harder variation

Month 3 → Rest drops from 90 seconds to 75 seconds

Month 4 → Cycle repeats at new baseline

The Signal to Watch

In the first two weeks — read Day 5 and Day 6 honestly.

Form holds on second push session → frequency is right, continue

Form degrades on second push session → take one more rest day between
drop back to Day 1/4 structure temporarily

Body feedback overrides the program. Always.

Nutrition — Natural Only

Protein → Eggs, meat, fish, lentils, dairy

Every meal contains a protein source

No powder, no supplement

Carbs → Around training — before and after sessions

Rice, oats, fruit, root vegetables

Fats → Eggs, nuts, ghee, coconut, fatty fish

Don't avoid fat — it's the hormonal raw material

Avoid → Ultra processed, liquid calories, refined sugar

Not as morality — as biology

The organism runs poorly on these

No calorie counting in Phase 1. Eat whole food, eat enough, eat protein at every meal.
That's sufficient for this phase.

Sleep

Target → 7-8 hours

Consistent → Same sleep and wake time daily

Including rest days

Temperature → Cool room

Morning → Sunlight within 30 minutes of waking

This is where testosterone is manufactured. Where muscle repairs. Where the day's learning consolidates. It's not rest from the program. It's the program running its most important process.

The Phase Timeline

Phase 1 Weeks 1-12 → Movement quality, neural pathway rebuild
Correct form before any load increase
Krav foundation laying quietly

Phase 2 Weeks 13-24 → Progressive overload begins in earnest
Harder variations enter
Sprint work introduced
Krav compounding

Phase 3 Weeks 25-52 → Advanced calisthenics progressions
Archer push up, L-sit, pseudo planche
Krav starting to become reflex not thought

Year 2+ → The system runs itself

What This Builds

Not a gym body performing strength.

Not a six pack chased for its own sake.

Month 1-3 → Neural pathways rebuilding
Movement quality improving visibly
Body relearning what it already knew

Month 4-6 → Visible body composition shift begins
Strength compounding quietly

Month 7-12 → Functional strength that works outside the program
The construction worker test starts passing

Year 2+ → The byproduct appears
Not because it was chased
Because the process was correct

The nine tails grow in silence.

That's the complete plan.
